Experience

Technology Service Intern *Elmhurst, IL*
York High School *Sept 2019 – May 2022*
- Certified through DELL to repair many different Chromebook models
- Lead a team of repair desk technicians to help students troubleshoot when possible and document any damages that may have needed repairs.
- Responsible for the repair and service for most devices in the surrounding school district.

IT Intern *Elmhurst, IL*
City of Elmhurst *May 2023 - Present*
- Worked on various projects such as inventory, system migrations, software installations, smart phone/tablet support, and monitored daily tape and NAS server backups.
- Shadowed IT professionals in performing technical and administrative tasks.
- Collaborated in weekly team meetings to discuss current and future citywide projects.

Projects

Java Chess *GitHub Repo* ↗
- A mock chess game built using java swing for a class final project. It features a clean MVC architecture with a board display, move tracking, save/load game functionality, and game state indicators.
- Tools Used: Java, Swing, Algorithms

SongScope *GitHub Repo* ↗
- Developed a database of songs compiled from YouTube and Spotify to have songs specifically tailored towards a user's interests.
- Tools used: Java SQL, Swing

NFL Play-by-Play *GitHub Repo* ↗
- Building a web-app for football fans to keep up with current games through the use of live field diagrams and AI commentary.
- Tools used: C#, Blazor, ESPN API, OpenAI API, .NET, git

Portfolio Site *GitHub Repo* ↗
- My current interactive developer portfolio built with Next.js, TailwindCSS, and TypeScript. Features interactive elements, dark mode, and responsive design.
- Tools used: NextJs, Tailwind, TypeScript
